# ENERGY DATA CONDUIT ENVERUS

#### GENERAL

The Conduit for Enverus maintains a local copy of Enverus's engineering, market research, production, rig, trajectory, and well data. We provide the data designed specifically for Esri's ArcMap, Tibco's Spotfire, and Microsoft's Excel, complete with ready-to-run templates built using SQL Server native spatial geometries.

## CONDUIT SYSTEMS OF ACCESS DESIGNED FOR ENVERUS

All referenced templates are in the 'Enverus' folder located inside the master Conduit file folder. Please check with your administrator for the specific Conduit folder location.

### ARCMAP / ARCGIS PRO

#### ENVERUS MAP.MXD

The ArcMap template includes a print layout in the document for ANSI E (34" x 44") size. There is also a ArcMap 10.3 version template supplied.

#### **ENVERUS MAP.APRX**

The ArcGIS Pro template loads the same data as the ArcMap template pre-connected to the Enverus database.

### ENVERUS DRILLINGINFO DATA FOR EXCEL

The Conduit for Enverus data comes complete with an auto-updated Microsoft Excel template for recent completion, lease, production, and well activity. These are updated daily in SQL Server and refresh automatically upon launching the template.
